

Part Number: **TC1279-274**  
Description: **UNDER FLOOR, MOUNTING, BRACKET**

## Use / Application:

The Under Floor Mounting Bracket enables ducting components to be quickly fastened and/or simply glued to a clean, dust free, concrete floor. A slot is provided at the top of the bracket for M12 (or other size) threaded rod. The threaded rod supports under floor ducting, or a HDODF installed on a raised floor. The HDODF is secured in 4 places using kit TC4050TMKIT. The bracket can be bolted to a concrete floor using 2 x diagonally placed M10 loxins with M10 x 30mm set screw and flat washers. The HDODF is electrically insulated from the concrete floor, by the plastic feet used.

## Technical Attributes:

- Simple means of securing under floor duct systems
- The bracket is simply Bolted or glued to a clean concrete floor
- Purchase by the unit

## Technical Attributes:

<b>Dimensions</b>	80mm (W) x 100mm (H) x 60mm (D)
<b>Weight</b>	0.5kg
<b>Materials</b>	Mild steel, Nickel Plated finish
